COVID-19 (coronavirus) SELF-ISOLATION GUIDELINES

If you are sick with COVID-19 or suspect you are infected with the virus that causes COVID-19, you are being asked to self-isolate and monitor your symptoms for up to two weeks.

**WHAT IS SELF-ISOLATION?**
Self-isolation also means avoiding situations where you could infect other people. Isolation is the term used for separating a person or group of people known or reasonably believed to be infected with a communicable disease and potentially infectious from those who are not infected.

**HOW DO I SELF-ISOLATE?**

**Stay at home**
- You should remain in your home, except for getting medical care
- Do not go to work, school, church, events, parties, stores, or any public areas
- Do not use rideshares, taxis, or public transportation until you have been released from self-isolation
- Ask for help getting supplies as you will not be able to go to stores or pharmacies
  - Ask friends or family to drop off groceries and supplies, or use a delivery service
- Ask a friend or family member to run errands for you

**Separate yourself from other people in your home**
- Avoid situations where you may have close contact with other people living in your home
- Stay on your own in a well-ventilated room (windows opened regularly) with the door closed
- Use a separate bathroom/toilet, if available and clean bathroom/toilet after every use
- Do not share utensils, towels, bedding or other items with other people
- Wash utensils/dishes thoroughly after use with soap and water (dishwasher ok to use)

**No visitors allowed**
- Do not invite visitors, friends, or family to your home
- Do not make contact with people at the front door — deliveries should be left at the door and the delivery person should leave before you open the door

**Wash your hands often**
- Wash your hands with soap and water for at least 20 seconds (preferred method)
- If soap and water are not available, use an alcohol-based hand sanitizer that contains at least 60% alcohol, cover all surfaces of your hands then rub them together until dry
- Avoid touching your face (eyes, nose, mouth) with unwashed hands
- Wash your hands after sneezing/coughing; before and after preparing food; before eating; after toileting; and when your hands are visibly dirty

**WHAT ELSE SHOULD I DO?**

**Practice common prevention measures**
- Cover your mouth and nose when coughing and sneezing — use a tissue not your hands
- Keep your surroundings clean. Clean surfaces that you share with others (doorknobs, bathroom surfaces) or that you sneeze and cough on with a standard household disinfectant such as Clorox Wipes.

**COVID-19 (coronavirus)**

**SELF-ISOLATION GUIDELINES**

**WHAT ELSE SHOULD I DO? (continued)**

**Wear a facemask**
- You should wear a facemask when you are around other people or pets and before you enter a healthcare provider’s office.
- If you are not able to wear a facemask (for example, because it causes trouble breathing), then people who live with you should not stay in the same room with you, or they should wear a facemask if they enter your room.

**Separate yourself from animals in your home**
- Do not handle pets or other animals while sick.
- If you are sick with COVID-19, avoid contact with your pet, including petting, snuggling, being kissed or licked, and sharing food.
- When possible, have another household member care for your animals while you are ill.
- If you must care for your pet or be around animals while you are sick, wash your hands before and after you interact with pets and wear a facemask.
- See COVID-19 and Animals on the CDC website.

**Monitor your symptoms**
- Seek prompt medical attention if your illness is worsening (e.g., difficulty breathing) or if you experience shortness of breath.
  - Before seeking medical care:
    - Call your healthcare provider and tell them you are being evaluated for COVID-19.
    - Put on a facemask before entering the facility.
    - If you have a medical emergency requiring 911, notify the dispatch personnel that you have or are being evaluated for COVID-19 and put on a facemask before they arrive.

**DISCONTINUING HOME ISOLATION**

Do not discontinue home isolation until you have been told to do so by your provider or state/local health department.

**FOR WORSENING SYMPTOMS:**
Contact your provider or call Campus Health at (520) 621-9202.

**OTHER RESOURCES:**
- Pima County Health Department: (520) 626-6016
- 98point6: www.98point6.com/arizona
  On-demand, text-based primary healthcare (online 24/7 for all University of Arizona students over age 18)

**MEDICAL:** (520) 621-9202
**AFTER HOURS:** (520) 570-7898
**CAPS 24/7:** (520) 621-3334
