

June 2019

Dear Parent(s):

To help prepare your student for a successful experience at the University of Arizona, the Campus Health Service would like to offer some important points for your consideration:

1. We are fully accredited by the Accreditation Association for Ambulatory Health Care (AAAH) and provide a wide array of health services conveniently located on the UA campus. Also, we have been in the Princeton Review's Top 4 for Best Health Services among 380+ colleges and universities for the past four years.
2. Most of our physicians are board-certified in a primary care specialty area. On-site services include Counseling and Psych Services (CAPS), Women's Health, Pharmacy, Health Promotion and Preventive Services and more. Feel free to drop by and visit us.
3. Our counseling staff of licensed professionals would like to remind you to stay in touch with your student by phone, text, or email as they embark on this new and exciting time of life.
4. Please review your medical insurance to determine if your student is adequately covered. For more information on available health care options, please [click here](#).
5. Make sure your son or daughter is up-to-date on their immunizations, particularly tetanus, diphtheria ("Whooping Cough"), Hepatitis B, Varicella (Chickenpox) and Meningococcal meningitis.
6. Talk with your son or daughter about not taking prescription medication that is not prescribed for them.
7. Last but not least, please remember to [upload your student's required Measles, Mumps and Rubella \(MMR\) immunization record](#).

Thank you, and we look forward to meeting you during Orientation!

David Salafsky, DrPH, MPH
Interim Co-Executive Director, Campus Health Service
The University of Arizona
